

Landing page proposes people to buy property of SMDC corporation located in the Philippines. They are located in other country and so could buy a touristic package to come there and see the property. So it is half selling property and half touristic. Tourism to look and buy property

Block #1 contains logo of SMDC, small slogan, 3 features of SMDC and the form

Block #2 I have reviewed and not sure it should be here. Definitely it contains section showing ;local partner of SMDC and I know they can change in Ukraine. So adding logo now doesn't have sence. All that the block should do is promo saying that a local representative will arrange travel to buy property. 4 photos are symbols of what they can propose - like hotel booking, relax conditions, property look up and touristic services. As well as slogan at the bottom.

Block#3 Why choose Philipines property. There will be text that I will put later. Pictures shows main features

1. investment opportunity
2. nice climate with relaxing stay
3. Long stay for retirement age - very easy to get residence permit
4. variety of education opportunities for children in international colleges
5. Retirement alternatives
6. Easy to stay - very loyal migration policy. Up to 3 years staying without leaving the country with touristic visa.
7. Own business opportunities
8. Christianity

Block#4 tells brief details about SMDC and a promo video

Block#5 is a set of promo videos of buying appartments opportunities. Clicking on them allow user to get more information about properties

Block#6 List of projects. Very obvious as for me  
I showed only 4 but there will be loaded more and more.

!!! So adding button "move to the top of page" looks like needed.

Footer just represents usual info like copywrite, address, social media icons (facebook etc)

Regarding the design I send you some examples but the only thing I know is that it should attract by the most nice feature of the Philippines - their nature and climate.

Here are design examples that I liked some parts inside but you are free to apply your own vision because I am not a designer.
